# certifiO
Employees

The trusted digital signature
that certifies your identity
and employment affiliation

Because not all signed documents require the same legal reliability, Notarius complements its electronic signature platform with a full suite of digital signature products adapted to the needs of public and private sector organizations, municipalities, and governments, ready to embrace digital transformation without compromising reliability.

CertifiO for Employees makes it easier to create authentic electronic documents that incorporate proof of **the signer's identity** and **organizational affiliation.**

Digital signatures with uncompromised legal reliability

Too often, the transition to a paperless workflow is stalled by concerns about the legal validity of electronic documents. Often these concerns are justified. Standard PDFs, for example, are easy to modify.

Do documents signed digitally have the same legal value as signed paper documents?

With CertifiO, *yes!*

Your digital signature is as legally reliable if not more, than your handwritten signature.

verifiO

An authorized employee signs an official document using **ConsignO Desktop** and sends it.

With **CertifiO for employees** digital signature, the employee's identity and employment affiliation are linked to the document.
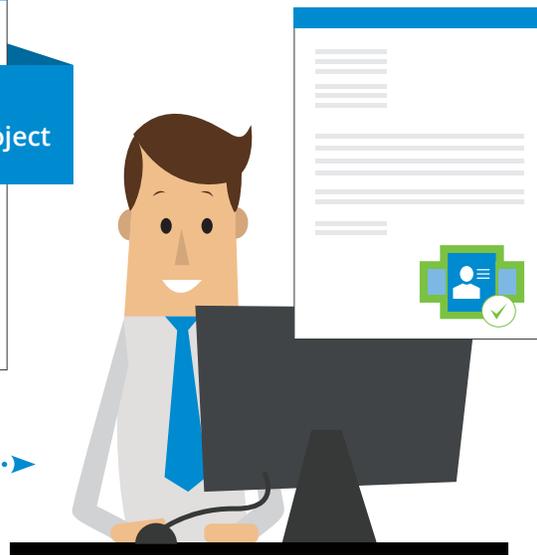

EMPLOYEE

Purchase order
HR contract - Internal project

The recipient receives the document and can verify that:

- The signer's identity is accurate and that he or she is an employee of a specific organization.
- The document has not been altered since it was created.
- The document is legally reliable.

RECIPIENT

The recipient of the digitally signed document with **CertifiO,** can view the signer's digital signature and verify the signature's status using **ConsignO Desktop** or a PDF reader such as Adobe Reader.

certifiO

Notarius, a leading certificate authority, issues the digital certificates necessary to sign electronic documents.

An outstanding guarantee of your documents origin, integrity, and authenticity.

ORIGIN

The origin includes the signer's identity, the time and date of the signature and the professional status or company name depending on the context.

INTEGRITY

A document's integrity is guaranteed when it is possible to verify that it has not been modified.

AUTHENTICITY

A document is deemed authentic when it incorporates proof of origin and its integrity has been preserved.

LONGEVITY

Document longevity ensures that the document can be opened, read and authenticated for several decades by:

- Using **PDF/A**, an ISO-standardized version of the Portable Document Format (PDF). ISO 19005 is specialized for use in the archiving and long-term preservation of electronic documents.

- Using **PAdES LTV** (ETSI TS 102 778), a standard enabling long-term validation of digital signatures, which makes it possible to confirm the signature's validity at the time of application regardless of the current state of the certificate (expired or revoked).

How to obtain a digital signature?

1 **Fill out the online form on the Notarius website**

2 **Have your identity verified online by one of our agents**

3 **Install the CertifiO Suite**

4 **Activate your digital signature once you have got the approval**

Who is Notarius?

A leading expert in electronic signatures, digital signatures, and long-term document reliability since 1998, Notarius is the only Canadian firm that issues trusted signatures recognized by Adobe (Adobe Approved Trust List – **AATL**) and Microsoft (**WebTrust** for CA). Notarius is an environmentally responsible, certified carbon-neutral business that holds ISO 27001 and ISO 9001 certifications. In addition to our certifications, you get peace of mind from knowing your documents are admissible as evidence (not merely prima facie evidence) under Canadian law.

Our expertise

Notarius has helped hundreds of organizations transition to digital technologies, and thousands of professionals adopt 100% digital practices that comply with the requirements of their professional order or association. Thousands of professionals, executives, employees, clients, and partners use our products to sign millions of legally valid documents every year. Notarius has a proven track record, developing solutions that meet the most stringent standards of security and confidentiality.

Environment

In addition to lowering document management costs and enhancing productivity, transitioning to digital signatures enables you to reduce paper use for a substantially smaller environmental footprint.

consignO
Desktop

Create and digitally sign
your official documents from your desktop

Say goodbye to the "Print, Sign and Scan" process

Printing, hand-signing and scanning paper documents (drawings and specifications, blueprints, contracts, and more) is a time-consuming process that results in lost productivity.

ConsignO Desktop is the ideal solution for preparing and easily signing official PDF documents. ConsignO Desktop offers a wealth of advanced features such as directly integrating attachments or appendices, stamping, conversion to PDF/A, batch signing, and affixing multiple signatures.

Legal reliability and document longevity

When used with CertifiO, ConsignO Desktop integrates all elements to ensure maximum legal reliability for digital signatures and documents. Document longevity is achieved with the conversion to PDF/A, an ISO-standardized version of the Portable Document Format (PDF). ISO 19005 is specialized for use in the archiving and long-term preservation of electronic documents.

ConsignO Desktop manages several approaches to document management

Sign PDFs, individually or in batch

Create PDF portfolios of multiple signed documents

Merge multiple PDFs into a single document

Sign PDFs with attachments

❶ The ideal document-creation solution

PDF/A conversion

The first step is always to convert your file to PDF/A, an ISO-standardized version of the Portable Document Format (PDF). ISO 19005 is specialized for use in the archiving and long-term preservation of electronic documents. Notarius recommends the PDF/A format for all documents with a lifecycle of 12 years or more.

Prepare signatures areas and personalized templates

With CertifiO it's easy to create templates for frequently used document types to automatically add signature areas, such as a template that always positions signature areas in the same locations. You can also apply templates to multiple documents simultaneously.

❷ Advanced options to make your life easier

| Define multiple signature areas in a document | Stamp | Digitally sign documents | Digitally sign multiple documents at once | Sign merged documents or organize documents in a portfolio |
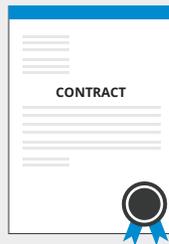

❸ Save time: right-click to access the most commonly used functions from your desktop

With just two clicks, you can select files in Windows Explorer and **execute a ConsignO Desktop function** like PDF/A conversion, signature, signature validation or merge.

Open with Adobe Acrobat Reader

ConsignO - 5. Sign...
ConsignO - 6. Reveal PDF/A documents...
ConsignO - 7. Reveal signed documents...
ConsignO - 8. Create a portfolio...

SIMPLICITY

The ConsignO Desktop interface was designed to be user-friendly and easily integrate into all operations, from document creation to final signature.

LONGEVITY

Document longevity ensures that the document can be opened, read and authenticated for several decades by:

- Using **PDF/A**, an ISO-standardized version of the Portable Document Format (PDF). ISO 19005 is specialized for use in the archiving and long-term preservation of electronic documents.

- Using **PAdES LTV** (ETSI TS 102 778), a standard enabling long-term validation of digital signatures, which makes it possible to confirm the signature's validity at the time of application regardless of the current state of the certificate (expired or revoked).

PRODUCTIVITY

Enhance productivity by creating custom templates, stamping, converting, and batch signing. ConsignO Desktop also provides the possibility of incorporating any attachment into the PDF, no matter what the file format (Excel, Word, HTML, CAD, BIM, XML, etc.), with PDF/A-3. With ConsignO Desktop you can also verify PDF/A compliance and signature validity on individual documents or batches.

Definitions...

Digitally sign a document
Affix a digital signature that confirms your identity and protects the security of your signed document.

Stamping
Affix an image of your stamp, signature, or initials on multiple pages at once.

Portfolios and merged documents
Reorganize your project documents to make sharing and use easier.

- **Merging:** combining multiple PDFs into a single document. This function is useful for gathering the documents to be signed into a single document.
- **Creating a portfolio:** storing multiple documents into a binder. Each document remains independent and exportable with its own properties and signatures.

consignO
Cloud

A digital and trusted electronic signature platform
with high-level legal reliability

Legally reliable signatures for everyone

ConsignO Cloud is web-based digital and trusted electronic signature platform with high-level legal reliability that enables public and private sector organizations, municipalities, and governments transition to 100% digital documentation, whether the signer is a professional practicing a regulated profession, a company executive, employee, client, partner, or citizen. Document signers do not need to subscribe or install anything on their computer. It's user-friendly, fast, and free.

Market-leading legal reliability

Documents produced with ConsignO Cloud provide a high level of legal reliability by incorporating all aspects necessary to establish document origin and integrity.

A user-friendly platform for managing multiple levels of digital identity.

WHO IS THIS PRODUCT FOR?

Organizations receiving high volumes of documents from external partners

VERIFIO INCLUDES:

• PDF/A compliance validation must be done only if the document was signed with Notarius signatures

• Support fees at $250 / hour if guaranteed revenues are below $8,000 / year

• Verification "pack" expires after 1 year. Unused verifications cannot be carried over to the next year

• **Standard Version:** Verifications limited to proof embedded in the PDF.

• **Premium Version:** Verifications default to proof embedded in the PDF, but can also reach our servers (on demand, for retroactive revocation, or if no proof is embedded)

• Free

• PDF/A compliance claim (no validation of actual compliance)

• Document signature presence (no signature validation)

• Requires an agreement with Notarius (software licences are needed)

• Only available in combination with other Notarius server-level products
